

ABOUT GLOBAL ENERGY

INTRODUCTION

Global Energy Development Corporation (GEDC) is a consortium of project professionals and developers for petroleum and electrical energy industry. GEDC is also a solution-oriented full-fledged energy and engineering Services Company with over a hundred years combined experience. Our members and associates are leaders in their fields who adhere to the highest standards for quality, reliability, and performance. Although the various entities in GEDC have successfully delivered landmark projects independently and in project groups, the emerging opportunities in developing economies, and the leverage from consortium synergy motivated the establishment of the international corporation.

GEDC has a strong team of accomplished entrepreneurs and investors besides over 40 professionals in various fields of expertise to package and deliver leading edge technology and innovative solutions to industry and Governments worldwide. With offices in three continents, we have the financial, technical and professional skills and resources needed to lead and collaborate with others in turnkey projects, investments, engineering, operations, and management. Clients and partners range from private individuals, small independent investors to major multi-national corporations, and governments requiring management of multimillion-dollar projects. GEDC office locations include Nigeria Canada, USA and the United Kingdom. Detailed information regarding the affiliate companies and key personnel and projects is available on request.

BUSINESS FOCUS

TO PROMOTE AND IMPLEMENT THE DEVELOPMENT OF PETROLEUM AND ELECTRIC POWER PROJECTS AS WELL AS OTHER VIABLE INFRASTRUCTURE.

CORPORATE CREDO

OUR GOAL: TO OFFER COST EFFECTIVE PROJECT SOLUTIONS THROUGH HIGH STANDARD PROFESSIONAL PRACTICE, WITH LEADING EDGE TECHNOLOGIES AND EXCELLENT CLIENT RELATIONS.

GEDC SERVICES AND EXPERTISE

GEDC provides project identification, engineering, procurement, construction and project management services, which are customized to meet client specific objectives. Our personnel have conducted detailed technical and economic evaluations of power stations, petroleum plants, tank farms, pipelines, bulk storage stations and various industrial facilities, and successfully executed the projects. Our power projects competency includes diesel-fired and natural gas-powered plants, co-generation, as well as alternative energy systems – wind, garbage and solar. Our services and expertise enable GEDC to offer solutions that are both high quality and cost effective.

Funds Facilitation

Funds facilitation services for our clients and partners are delivered through equity mobilization, private placements, bonds, stocks and loan syndication. These are structured in various ways depending on the specific projects.

Feasibility Studies

With a professionally executed feasibility study, the economic and overall justification of a project can be determined carefully taking into consideration the market forces, financial considerations, socio-economic environment and regulatory impacts. GEDC can assist clients in making decisions that will be most beneficial, through our network of industry leaders and economic specialists.

Turnkey & Project Management

GEDC provides consultancy and contracting services and delivers projects on turnkey basis as may be required. Applying the best practices of project management the company follows the ISO-certified Project Management Methodology of the Project Management Institute of which our engineers are members. We diligently move projects from initiation and planning through executing and controlling to successful closure, under budget, within schedule, and with high quality.

Equipment

Our alliance with American and Canadian companies of international repute brings to bear a wealth of experience and equipment knowledge in the field of petroleum process, gas gathering and compression plants and power systems. Our combined efforts offer effective solutions and guarantee successful project performance to clients in front end engineering, procurement, installation, commissioning, operations and maintenance of power and process equipment.

Inspection

GEDC provides unique service to industry, a combined power, process and mechanical inspection service. In addition, we investigate, analyze problems and give on-site solutions with preliminary reports issued at the facility thereby minimizing waiting time.

Due Diligence

We conduct due diligence to ensure authenticity, achieve regulatory compliance and for project cost-effectiveness and business excellence. Our services cover corporate credentials verification, plant design reviews, process safety, procurement audit, environmental liability assessment, etc

Turn Around Maintenance (TAM)

GEDC can plan, and coordinate the entire Turn Around Maintenance in close co-operation with our clients to achieve the most, out of the turn around and keep down time to a minimum.

Unit Operations Review and Monitoring

GEDC provides unit operations review, monitoring, and *Six Sigma Improvement* services with the objective of achieving optimum performance. After study, based on collated operating data, measured against standards and set goal, recommendations are provided on how to utilize existing equipment and processes optimally.

Training and Manpower Development

Knowledge and experience accumulated over years of installation and operating experience have been developed into modular courses. The subject areas include raw material handling and transfer systems, instrumentation and control, petroleum refining systems and power generating systems. Each of these subjects can be tailored to client's specific needs. GEDC delivers these modular courses to plant personnel. This training is normally provided in conjunction with a service agreement in preparation for a GEDC Startup, turn around or revamp. The training can be provided for technical and non-technical employees. Our unique model of *Six Sigma Business Improvement Methodology (SSBIM)*, which is applicable to administration and technological processes, is immensely beneficial to management personnel in public and private establishments.

Technical Evaluation

GEDC will evaluate available processes that can enhance profitability. Further to performing detailed economic and technical evaluations of the available technologies, the endorsed processing scheme will

incorporate the consideration of product value, feedstock cost, operating costs, energy efficiency, and capital investment, operating characteristics, environmental conservation and safety concerns.

Environment and Safety Management

Effective management of environmental and safety concerns requires careful planning throughout industry and the wider environment. GEDC conducts site-specific baseline environmental, process safety management studies. The findings are utilized during equipment operations to comply with regulatory standards. Our pollution studies include air, water, soil, and solid waste for municipalities and regions of interest.

AFFILIATIONS

American Refining and Canadian Generation Technologies & Institutions

GEDC and its respective team of manufacturers co-operate to provide engineering, procurement, construction and management for process and power equipment. Our representation covers the Africa Region. This partnership has provided our clients with seamless and technically superior service that takes advantage of diverse, complimentary capabilities and experience of our affiliates. Professionally our members are affiliated with various engineering institutions – the Engineering Council UK, the Council for the Regulation of Engineering in Nigeria, the Canadian Council of Professional Engineers, as well the Project Management Institute (PMI), and the Nigerian Institute of Management.

SG Oil and Gas Services

For about two decades SG Oil and Gas Services (SGGS) performed successfully in the promotion, delivery of projects and services in the petroleum and electrical energy sectors in the ECOWAS region (Economic Community of West African States). In 1995 to 1996, SGGS participated in the World Bank project of Emergency Energy Rescue Programme for Chad Republic and Sierra Leone. SGGS is presently operating energy services and would be GEDC's operating company for the upcoming refining and power projects in Africa.

Pholjos Limited

Pholjos Limited is a firm of Chartered Engineers and Contractors. They specialize in Electrical, Mechanical and Civil construction projects for the Petroleum, Food and Property development sectors of the economy. They have accreditations with the Federal Ministry of Works, State Governments, Institutions, and oil companies. Notable among their clients are Total-Elf Nigeria Limited, Lagos State University, UAC of Nigeria PLC.

Sanlat Engineering Ltd.

GEDC and Sanlat Engineering Ltd. have co-operated over the years to offer construction and project management services for various companies in Nigeria. Sanlat has a strong track record of successful capital projects such as Mobil Oil Lubricant Plant and NNPC Headquarters and Dubri Oil Office Complex.

Plan-Eng Consultants, Nigeria

GEDC and Plan-Eng Consultants – Management and Engineering Consulting, have cooperated on many projects offering comprehensive project development services ranging from Project Identification through Engineering Design to Operations Management. Among their landmark projects are the 8-storey African Petroleum Plaza Abuja, Corona School Hostel and Auditorium, TAB Plastics Factory Kaduna, as well the Nigeria French Village Computer Centre currently under construction.

Palfe Associates, Nigeria

Is a versatile innovative and successful Mechanical and Electrical Engineering Consulting Firm with landmark project track record in Rural Electrification, Industrial and Commercial Projects across the country including Dangote Flour Mills projects, University Master Plans (Ado-Ekiti, Epe), High Rise Buildings, Teaching Hospitals (Ibadan, Ogbomoso) and WAMCO Factory Ikeja

Plan-Eng Consulting Inc, Canada

Plan-Eng Consulting is a specialized firm in engineering and project management. The firm's consultants have rich and wide experience in heavy industries – petrochemicals, mining, oil & gas, commercial and residential complexes in Alberta, Nunavut and the Northwest Territories. The strength of the team lies mainly in power generation, green energy, power distribution, building services, project scoping, scheduling, controls and stakeholder management.

H.B.W. Services (Canada) Inc

H.B.W. Service Inc is a reputable supplier of oilfield and process equipment and tools including drilling bits, rigs, oilwell Christmas Trees, and field personnel. From their base in the heartland of Alberta oils and gas field represents top-notch Europe and North American manufacturers with a global market outreach.

REFERENCES

Project references of the consortium members include: Mobil Oil, Total-Elf, Oando, UACN, Dubri Oil, Honeywell, NNPC, Nigerian Petroleum Refinery Corporation, Chevron, African Petroleum Nigeria PLC, Dow Chemical Canada, Rio Tinto Diavik Diamond Mines, Southern Alberta Bible Camp, Guy Architects.

CORPORATE TEAM

Fola Soboyejo, P. Eng, C. Eng, FNSE, MNIM, PMP

Mr. Soboyejo is the Chief Executive and co-founding principal. He manages the resources, daily operations and long-term direction of GEDC. He negotiates and coordinates the firm's commissions and provides quality management system advisory services. After graduating from Portsmouth University in England with an honours degree in Electrical Engineering, he undertook professional skills development programmes including Plant Management at the University of Ibadan, Project Management at the Administrative Staff College of Nigeria, and Strategic Marketing Management at the Lagos Business School. Mr. Soboyejo's career spans consulting, engineering, operations, maintenance, marketing and management in the oil and gas, mining, petro-chemicals, power generation as well as construction industries. He made his mark in many positions of responsibility including the (start-up) General Manager and COO of Honeywell Oil & Gas Ltd., which remains a major player in the West African oil sector. Fola also held senior engineering responsibilities in Pro-Consulting (Design and Build) Edmonton, Dow Chemical Canada, and Rio Tinto Diavik Diamond Mines in the Canadian Arctic.

A professional engineer in Canada, registered engineer in Nigeria, Chartered Engineer in the UK and management consultant, he has over 25 years experience in the energy industry. He is a member of the Engineering Association Alberta (APEGGA), the Institution of Electrical Engineers (now IET) and the Engineering Council (UK), Fellow of the Nigerian Society of Engineers, Member Nigerian Institute of Management, and holder of the Certified Diploma in Accounting and Finance (ACCA, UK). He is an

accredited Project Management Professional. Engr. Soboyejo is the Executive Chairman Pholjos (Constructions) Limited and Foliz Services (Canada), and Principal, Plan-Eng (Engineering and Management) Consultants. He has volunteered for over 25 years with the Lions Club International and had served as Deputy District Governor (Nigeria District 404), and is a Melvin Jones Fellow. He provides corporate leadership and strategic direction to ensure that GEDC policy and performance objectives are met.

Emmanuel Alade, BL, LLB, LLM

Emmanuel Alade is the Company Secretary and General Counsel of GEDC. He is a Barrister-at-Law, Solicitor and Advocate in Alberta and Nigeria – called to the Bar in 1993. After graduating in law with over a decade of legal practice in Nigeria, he secured a scholarship to the University of Alberta, Edmonton where he obtained the Masters degree specializing in Oil and Gas as well as Oil Sands Law. He has distinguished himself in corporate law practice and service to the oil industry in Canada and Nigeria. Mr. Alade is the Principal Partner in the law firm City Law Offices in Alberta

James Mitchell, CMA

Mr. Mitchell is a Professional Accountant with extensive local and international experiences with equity mobilization, private placements, growth management, strategic planning and implementation of financial systems. He provides specialized and strategic Funds facilitation services to clients and develops new businesses for GEDC. He represents the company at negotiating process. He is the chairman of ACCUTAX firm in British Columbia.

John Dobroski

Mr. Dobroski is a Director responsible for all matters related to human resources, office administration, outside supplier relations, accounts payable and receivable and systems administration. He is also responsible for establishing, coordinating and promoting good corporate citizenship programs. He assists all GEDC staff in obtaining the tools necessary for the efficient execution of their duties and sources outside vendors of various goods and services necessary for the company's operations. He has international experience on projects in central and North America, as well as Asia. He also has an extensive career in service to government, government agencies and social and civic organizations. Before joining GEDC, Mr. Dobroski worked several years as Computer Analyst and Reverend including initiatives for accelerating resource development, research, mentoring, and talent recruitment. He created net credit loss and production statistics reports for regional leaders.

Olufemi Ladipo, FCA, FCIT, MNIM, MBA.

Mr. Ladipo is Finance Director Africa Region, develops new businesses for GEDC and searches for potential private individuals and corporate investors. He holds a MBA in Management from Enugu State University in Enugu, Nigeria. Mr. Ladipo is a Fellow of both Institute of Chartered Accountants of Nigeria and Chartered Institute of Taxation of Nigeria. He is also a member of Nigerian Institute of Management. Mr. Ladipo has over twenty-two years work experience within the fields of Energy Industry, Commerce, Government, Private Professional Practice and Consulting. During this period, He managed financial analysis, accounting, strategic planning and system development activities as well as tax and business advice to private and corporate bodies. Before joining GEDC, Mr. Ladipo worked as the Financial Controller of IPCO Nigeria Limited, a subsidiary of an oil service multi-national company.

Keith Walsh

Mr. Walsh is Business Development and Investor Relations Director of GEDC. He searches for potential local investors interested in investing in international projects of emerging economy in developing countries. Mr. Walsh provides specialized and strategic services to clients and develops new business for GEDC.

Daniel Obaro, Ph.D

Dr. Obaro is a Materials and Corrosion Engineering expert. He obtained his bachelors degree in Applied Geophysics from the famed University of Ife (now Obafemi Awolowo University). An outstanding student, Dan Obaro obtained his masters 1979, and doctorate degree 1984 from the Imperial College University of London. He has written many published papers on the subjects of Corrosion Mechanisms and Protection, Effluent Control, as well as Fluid Flow and thermodynamics. He is an accomplished specialist in plant design, plant appraisal, combustion engineering and corrosion.

Dan has trained scores of engineers and technologists as lecturer at the Yukon College and the Northern Lights College British Columbia in Canada, as well as the university of Science and Technology, Port Harcourt Nigeria. He was Production Manager at the integrated steel plant complex Ajaokuta Nigeria. He is a consultant to a number of organizations including Cub Engineering Canada Limited, Alberta Corrosion Technologies Inc, Canada as well as the United Nations Development programme. Dan Obaro is a director of Global Energy Development Corporation.

Engr. Victor Soares, MNSE, AMASHRAE, AMIPLANTE (UK), MTSN

Victor Spares is the Director, Engineering Services. He is a seasoned Mechanical Engineer with wide experience in petroleum midstream and downstream sectors with over 20 years distinguished career

with Texaco Petroleum in Nigeria and the United States. He recorded excellent performances as Mechanical Engineer, Maintenance Engineer, Chemical Sales Engineer, Regional Sales Manager, and Technical Services Manager. Apart from Nigeria where he designed and managed numerous petroleum plant development projects, he acquired experience at various Texaco US plants at Port Arthur and Houston Texas, as well as Beacon, New York.

Victor graduated from the renowned Yaba College of Technology and is a Registered Engineer in Nigeria, Member Nigerian Society of Engineers, Associate Member of the Institute of Plant Engineers in the UK, as well as Associate Member American Society of Heating Refrigeration and Air Conditioning Engineers (ASHRAE).

Lanre Ogunleye, B. Mech. Eng

Mr. Lanre Ogunleye is an Associate Partner, GEDC and Chief Executive Officer of Jolantt Oilfield Services Inc. with operations in Alberta Canada and throughout Nigeria. A mechanical engineer by profession and alumnus of Southern Alberta Institute of Technology brings to GEDC a wealth of entrepreneurship, business acumen and strong inter-personal relationships. His responsibilities include business and markets development.

Brent Quirico

Is a business consultant and merchant with a wealth of experience of over twenty five years in the oil and gas and construction industries. He has investments in concrete products manufacturing. A reputable distributor for North American and European oil and gas equipment and tools manufacturers, Mr. Quirico organization supplies variety of oilfield and process equipment and tools including drilling bits, rigs, oilwell Christmas trees, and field technical personnel throughout western Canada. Brent brings to GEDC global business outreach and rich down-to-earth knowledge of the industry as a director.

Solomon Ajibade Adeleye, Ph.D., P. Eng.

Dr. Adeleye is Executive Director and co-founding principal, focuses on building strategic partnership and long-term direction of GEDC. During the past several years, he has provided management and technical consulting to various industrial and environmental projects. Dr. Adeleye holds a Ph.D. in Chemical Engineering from Imperial College, London, England. He brings to the team over 15 years diversified background experience in applied chemical and environmental settings, as such, industrial process evaluation, process optimization, industrial compliance assessment, with focus on the Energy and Petrochemical sectors. He negotiates and coordinates clients' engagements and co-ordinates work activities. Before the incorporation GEDC, Dr. Adeleye worked on various projects in Nigeria, India, United Kingdom and Canada. He worked for the Centre for Energy Research and Training (Nigeria) and Imperial College, London at the Nuclear Chemical Engineering Research Laboratories as a Research Officer. He carried out Due Diligence investigations for upstream and downstream oil & gas operations for the World Bank. He has also held positions with Nigerian Petroleum Refinery, Nigerian Fertilizer Company (Kellogg Plant), Ajaokuta Steel Company, Komex International Ltd. including environmental assessments and due diligence studies for Shell, Oando, Petro-Canada, and Worley Parsons – the global EPCM company. He is in charge of strategy, performance programs and technical Department. He has a creative and imaginative approach to problem solving, implementation of projects and seeking new ways of completing projects better, faster and more economically. He is a member of The Association of Professional Engineers and Geologists of British Columbia.
